**Institution/Company:** Securities Litigation and Consulting Group, Inc.

**Employer Type(s):** Business or Industry

**Position Type(s):** Research

**Subject Area(s):** Finance – Economics - Mathematics – Statistics – Accounting

**Geographic Location:** Tysons Corner, VA

### Position Description:

Securities Litigation and Consulting Group (SLCG) is seeking recent Masters in finance, economics, mathematics, statistics, accounting or a related field with demonstrated empirical or modeling expertise for our litigation and investment advisory practice. We are especially interested in candidates with strong applied mathematics skills and proficiency in at least one of the following programming languages: MATLAB, C++, Java, VBA, or R. The ideal candidate will be articulate, personable and able to work as a team member and independently under pressure. SLCG offers competitive compensation, a collegial work environment and the opportunity for considerable professional growth.

SLCG is a financial economics consulting firm based in the Northern Virginia suburbs of Washington, DC. SLCG provides consulting services and expert witnesses to law firms, regulatory agencies, publicly-traded corporations, banks, brokerage firms and individuals involved in complex litigation throughout the United States. Our litigation work includes securities class actions, trust management, brokerage industry disputes, white collar criminal proceedings as well as regulatory investigations. SLCG staff includes PhD, MA and BA level professionals with academic, industry and government experience.

Please send resume and cover letter to [slcgjobs@slcg.com](mailto:slcgjobs@slcg.com) with “Financial Economist Application” in the subject line.
